### Overlays

Following is a list of hand controller overlays currently posted on our web site. Click on a title to display overlay. More titles will be added to this list.

For most games, the left and right controller overlays are identical - of the games listed here, only USCF® Chess uses different left and right controller overlays.

All Mattel Electronics, Activision, Atarisoft and Imagic games came with controller overlays; all Coleco, Interphase and Sega games came without them. All original INTV Corporation releases except World Championship Baseball did not come with overlays and, when possible, INTV did away with overlays for their re-releases of Mattel Electronics games.

### ABPA® Backgammon
